MODEL FACT SHEET / FIKRA MODEL 2 – 4B

Fikra Model 2 – 4B.

A 4B-parameter instruction-tuned model for private, on-device, offline-first use. Built in Nairobi. Apache 2.0.

4B	262K	EN + SW	91.3%

SPECIFICATIONS

Model	Zabibu Fikra Model 2 – 4B	**Internal**	fikra-v2-e4
Parameters	4,205,751,296	**Context**	262,144 tokens
Base	Qwen/Qwen3.5-4B via fikra-v2-e3	**License**	Apache 2.0
fp16	8.43 GB	**Q4_K_M**	2.71 GB
F16 GGUF	8.42 GB	**Release**	2026-11-06

BENCHMARKS

TASK	RESULT	NOTES
Fikra release suite	105/115 · 91.3%	115 auto-checked cases
Held-out paraphrases	9/10 · 90.0%	Contamination check
MMLU	75.5%	10 samples, fp16
HellaSwag	68.0%	10 samples, fp16

RUN IT

Q4_K_M runs on CPU with llama.cpp, Ollama, LM Studio, or another GGUF runtime. The beginner guide is at **zabibufikra.vercel.app/run/**.

LIMITATIONS

No published cross-language Swahili benchmark. No live information; recency is limited to training data. The model can hallucinate on specialized domains. It may emit <think> blocks; strip them in post-processing. Inherited Qwen/Qwen3.5-4B biases; not externally red-teamed. Q4_K_M has not been re-evaluated; expect 1–3 points vs fp16 on short-form evals.
